Thanks Marge

Plans have been announced to hold a two-day work bee Saturday and Sunday in an all-out effort to wrap up the major building phase of the South Haven Edward W. Thompson Legion Home. The plan calls for all available Legion members to report to the post starting at 9:00 am both days to help with the final installation of rock lath. Following the lathing program, contractors can then plaster and install the ceiling. This will be followed by the floor tile and the final plumbing installation
