

E MAIL FROM RYAN 1 3 2011

Hi all

E-mail from Ryan to Brian 3-1-2011.

I talked to Brian this morning and he said they are going to start moving in stone and the wall blocks to the site.

His plans are to start as soon as the snow has left from the bank. (The man up stairs permitting).

His plan is to do the job in sections to minimize the impact of the bank moving.

He wants us to wait with taking down the old fence until later. He will give us two week notice.

He also told me that he would like to take our lawn care for this season (AT NO COST) .I took it on my own to give him the Ok. Thanks Brian

I will be putting this on the display in the post hall way with attachments some time today also will update the RETAINING WALL menu tab on our web site at legionpost49.org

Thank to all again
For all your help with this

If any one would like for me to remove your addy from this mail list let me know. By the same if you hear some one wanting to be added let me know

Comments/??????????

Brian,

Attached is a copy of the SESC permit for the post project. The permitting official required a couple of minor changes to the plan prior to issuing the permit, these our outlined in the attached Bulletin #1.

Please review and let me know if these revisions will require any contract adjustments.

With this I believe that you should be all set to begin work whenever the weather allows. Please contact me when you are mobilizing to the site so I can get the project on my schedule and let our survey department know that staking will be needed soon.

Thanks

Ryan Ysseldyke, P.E.
